ML Pipeline - ML Model CI

1. Repository Link

GitHub Repository: https://github.com/Mariamm566/ML-Model-CI

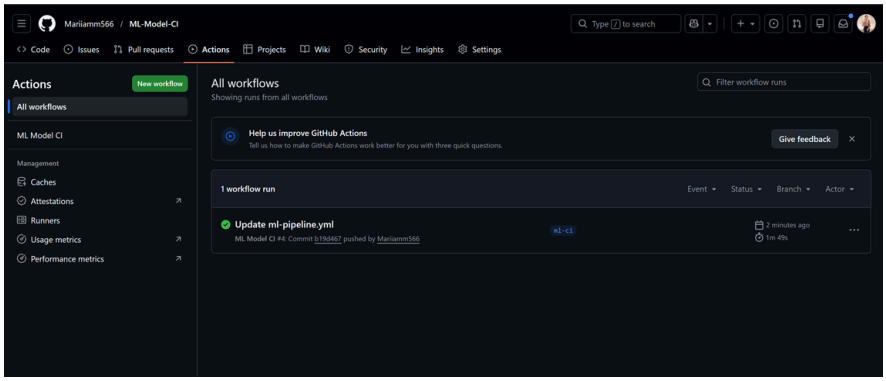
2. Bugs Found in the Original YAML and Fixes

#	Bug	Why it's wrong	Fix applied
1	Broken indentation	YAMLrelies on precise spacing. Incorrect indentation prevents the workflow from being parsed correctly.	Fixedindentation under all sections.
2	Missing checkout step	The runner cannot access repository files unless the repository is checked out first.	Added actions/checkout@v4.
3	Empty linter step	The step existed, but it did not execute any validation command.	Added a Python syntax check using py_compile.
4	Mis-indented run block	The command under Model Dry Test was not aligned correctly, so execution could fail.	Corrected the run block indentation.
5	Wrong push trigger logic	The workflow was configured to run on main instead of all branches except main.	Changed the push trigger to branches-ignore: main.
6	Missing artifact upload	README.md was not uploaded even though the assignment requires it as an artifact.	Added an upload-artifact step with the name project-doc.

3. Workflow Trigger Explanation

TriggerLogic: Runsautomaticallyoneverypushtoall branches except **main**

4. Artifact Explanation

Artifact Name	File Included	Purpose
project-doc	README.md	Projectdocumentation for review


5. Evidence
